BS in Computer Engineering

## SAM'S WORK EXPERIENCE

Lead Full Stack Software Engineer, Quartet Health, New York, NY May 2017 – Present

- Launched and lead iteration on the company's flagship mobile-first web app
- Architected and implemented a company-wide database transition strategy
- Lead the development of multiple features from ideation to implementation
- Restructured existing applications to meet WCAG accessibility requirements
- Interview, onboard, and mentor new engineering employees
- Regularly present engaging demos to both technical and non-technical audiences
- Heavily contribute to workspace documentation
- Triage live production issues in a timely manner during on-call rotations

Professor, University of Pittsburgh, Pittsburgh, PA

Jan 2017 – May 2017

- Instructed a Python programming course with over 50 students
- Catered to all learning styles by offering public and private office hours
- Created automated grading programs to grade projects for over 100 students
- Received a 4.8/5 on ratemyprofessor.com by my students

Software Development Intern, Sylogent, Newtown, PA

May 2016 – Dec 2016

- Developed a 1-click live-feedback process to automate application deployment
- Automated dynamic email responses between clinical trials and our clients
- Created an internal marketing application to gather information on potential clients

Branch Manager, College Works Painting, Pittsburgh, PA

Feb 2014 – Aug 2014

- Personal sales from cold calls in excess of \$83,000 in less than four months
- Sourced, hired, trained, and managed 7 employees in sales and production

## INTERESTS AND HOBBIES

- Perform in a semi-professional a cappella group
- Create small-scale wood, metal, and paper sculptures
- Maintain a small, but lush urban herb garden
